Algae - The Super Feedstock

No Land is needed (Grows in the Sea).

No Soil is needed (Arable Land used for Food NOT Feedstock).

No Fresh Water is needed (Grows in Salted Water).

Available around the Year (Limited Seasonality).

Short Growth Cycle (Fast Replenishment of Feedstock).

From Sea to Process (Limited Storage Needed).

Yield higher by 10s of times than any Crops per same area (Very Attractive Energy Economics).

Limited Prices Fluctuation (Stable Energy Prices).

An aerial photograph of a pond surrounded by green trees and grass. The water surface is covered with a semi-transparent teal overlay that has a wavy, ripple-like texture. The text "Let's Catch that Carbon!" is centered over the pond in a white, italicized font.

Let's Catch that Carbon!
